Who is publishing with Nxtbook?

Nxtbook works with leading content creators from around the globe in order to create engaging curated experiences.

Meaningful Digital Engagement is Difficult to Attain.

Our platforms make it possible. (Like over 7 minutes per visit possible)

"Now is the time when the greatest businesses of the next decade will be built. Now is the time when the most innovative companies take market share from those who are just holding on. Nxtbook can help you build innovative digital experiences that engage and delight digital audiences."

Joe Pulizzi

Content Marketing Strategist, Speaker, and Best-Selling Author

Engage Your Audience On Their Terms

Responsive publications automatically adjust based on your reader's device. This means that no matter what device they're using, your content will be displayed in a beautiful, simple layout that creates an optimal reading experience.

Our HTML responsive platform, PageRaft, helps you meet the demands of an increasingly mobile world without the need to recreate different templates or layouts for different devices. Our nxtbook platform is a great option for those who already have design files or PDFs and want to create an immersive digital experience.

With Nxtbook Media, the choice is yours. You can design your digital content on your own

or simply send us your PDF or InDesign file

and we'll help deliver a flawless digitally optimized publication.

With a PageRaft license you have the power and tools to design your content directly in the software for a digital-first reader

experience. With a nxtbook license, you can transform your existing content into a digitally

optimized publication.

Publish once. Distribute Everywhere. Once your content is published, it will be available on desktop and mobile browsers.

Want to keep your content private? Our

platforms can make that happen as well.

With Nxtbook Media, the choice is yours. You can design your digital content on your own

or simply send us your PDF or InDesign file

and we'll help deliver a flawless digitally optimized publication.
